

# Foam creams with patented BarrioExpert® LIPO<sup>2</sup> Skin Repair Technology

One frequent feature of dry skin is a damaged skin barrier: gaps in the lipid matrix allow moisture to escape from the inside, while allowing allergens, germs and other stress factors to enter from the outside. This is why we developed BarrioExpert® LIPO<sup>2</sup> Skin Repair Technology, which contains “skin-related” lipids.

The structural characteristics of these lamellar lipids are similar to the skin’s natural barrier lipids. They adopt the same position in the typical double-layered structure and can therefore take their place in the damaged lipid matrix. This closes the gaps in the lipid film and repairs the skin barrier. Sealing the gaps helps protect against moisture loss from the inside as well as unwanted stressors from the outside – ultimately promoting skin regeneration.

Gaps in the skin's lipid matrix allow microbes and other stressors to enter

Skin-related lipids fill the gaps in the lipid matrix

The original protective skin barrier is restored, promoting skin regeneration

## The advantages of BarrioExpert® LIPO<sup>2</sup> Skin Repair Technology

- “Healthy” skin barrier restored in only 4 weeks
- Creates an environment that encourages the skin to regenerate

# Daily foot care tips for healthy feet!

Keep your feet healthy by following these simple steps:

- Clean your feet every day with a mild soap and always dry them well – especially between the toes.  
(NOTE: Using a hairdryer on the lowest setting dries even the trickiest of places!)
- Apply a suitable Podoexpert foam cream after washing and then apply again at bedtime.
- Wear different shoes each day. After each wear, sanitize your shoes with the **Podoexpert Shoe and Foot Deodorant** and let them air dry.
- Footwear should be purchased in the evening when feet are largest and the fit will be best.
- Footwear should fit comfortably from the start. “Breaking in shoes” is a poor choice and can create friction zones where painful corns can develop.
- Women should always take a “nail polish holiday” as the chemicals in nail polish can have negative effects on the nail plate.
- Check with your foot care practitioner if you experience persistent foot problems or changes to a toenail.

Introducing Podoexpert – by Allpremed®

# The all-new, state-of-the-art approach to foot care

for everyday and clinical applications

**PODO  
EXPERT**  
BY ALLPREMED®

## Our foam creams

Our outstanding **foam cream** invention spawned a new era of foot care founded in science, medicine and groundbreaking skin care technology. Traditional creams and lotions are typically greasy and often occlude the skin. By introducing **foam cream**, we overcame this problem and have taken skin care to a new level.

Together with a team of podiatrists to help meticulously adjust our formulas, we developed our novel BarrioExpert® Technology. This technology is a unique, breathable mesh which forms over the skin yet does not disturb its physiological function. BarrioExpert® creates the base for a family of easily-spreadable foam creams with extremely rapid absorption and ultra-smooth application.

We then added new, innovative biomimetic (skin-related) lipids which function harmoniously with other carefully selected, scientifically-supported compounds. Together, they work to boost the restorative synergy of moisturization, hydration and regeneration of the skin.

The result? Podoexpert by Allpremed® – A powerhouse family of elite foot care products with **state-of-the-art** performance.

**PODO  
EXPERT**  
BY ALLPREMED®

### Podoexpert by Allpremed® foam dry to cracked skin – without urea

- Elite formulation for the protection of dry, cracked and heavily callused skin
- Clinically proven formula on the basis of patented BarrioExpert® LIPO<sup>2</sup> Technology
- Non-greasy and non-occlusive
- Enriched with skin-equivalent biomimetic lipids that strengthen and protect the skin barrier
- Ideal for daily maintenance and for sensitive skin

BARRIOEXPERT® LIPO<sup>2</sup> TECHNOLOGY  
SUITABLE FOR THE SKIN CARE OF DIABETICS

### Podoexpert by Allpremed® foam dry, reddened and itching skin

- Elite formulation for the protection of dry, red, itchy, scaling and peeling skin
- Scientifically formulated on the basis of patented BarrioExpert® LIPO<sup>2</sup> Technology
- Non-greasy and non-occlusive
- Enriched with skin-equivalent biomimetic lipids that strengthen and protect the skin barrier

BARRIOEXPERT® LIPO<sup>2</sup> TECHNOLOGY

### Podoexpert by Allpremed® foam dry to cracked skin

- Elite formulation for the protection of dry, cracked and heavily callused skin
- Clinically proven formula on the basis of patented BarrioExpert® LIPO<sup>2</sup> Technology
- Non-greasy and non-occlusive
- Enriched with skin-equivalent biomimetic lipids that strengthen and protect the skin barrier

BARRIOEXPERT® LIPO<sup>2</sup> TECHNOLOGY  
SUITABLE FOR THE SKIN CARE OF DIABETICS

### Podoexpert by Allpremed® spray shoe and foot deodorant

- Scientifically formulated to target bacteria that causes foot odor
- Leaves a fresh, revitalizing scent and cools the skin
- Enriched with tea tree oil and menthol
- Ideal for sanitizing and refreshing both shoes and feet
- Will not harm leather and canvas

### Podoexpert by Allpremed® cream cracked heel

- Softens calluses and moisturizes the skin
- Scientifically formulated on the basis of patented BarrioExpert® LIPO<sup>2</sup> Technology
- Softens calluses and moisturizes the skin
- Enriched with skin-equivalent biomimetic lipids that strengthen and protect the skin barrier
- Ideal as an additional night care serum to optimize the hydration of dry and cracked skin

BARRIOEXPERT® LIPO<sup>2</sup> TECHNOLOGY

### Podoexpert by Allpremed® tincture healthy nails

- Scientifically formulated to care for, protect and condition dry, brittle nails
- Strengthens, moisturizes and mineralizes the nail plate
- Enriched with panthenol and piroctone olamine to keep the nails healthy

NAIL RP INFUSION TECHNOLOGY
